

StackPro

Your cost effective and smart solution to automate stacking and de-stacking.

The Best
3D Interface
Available

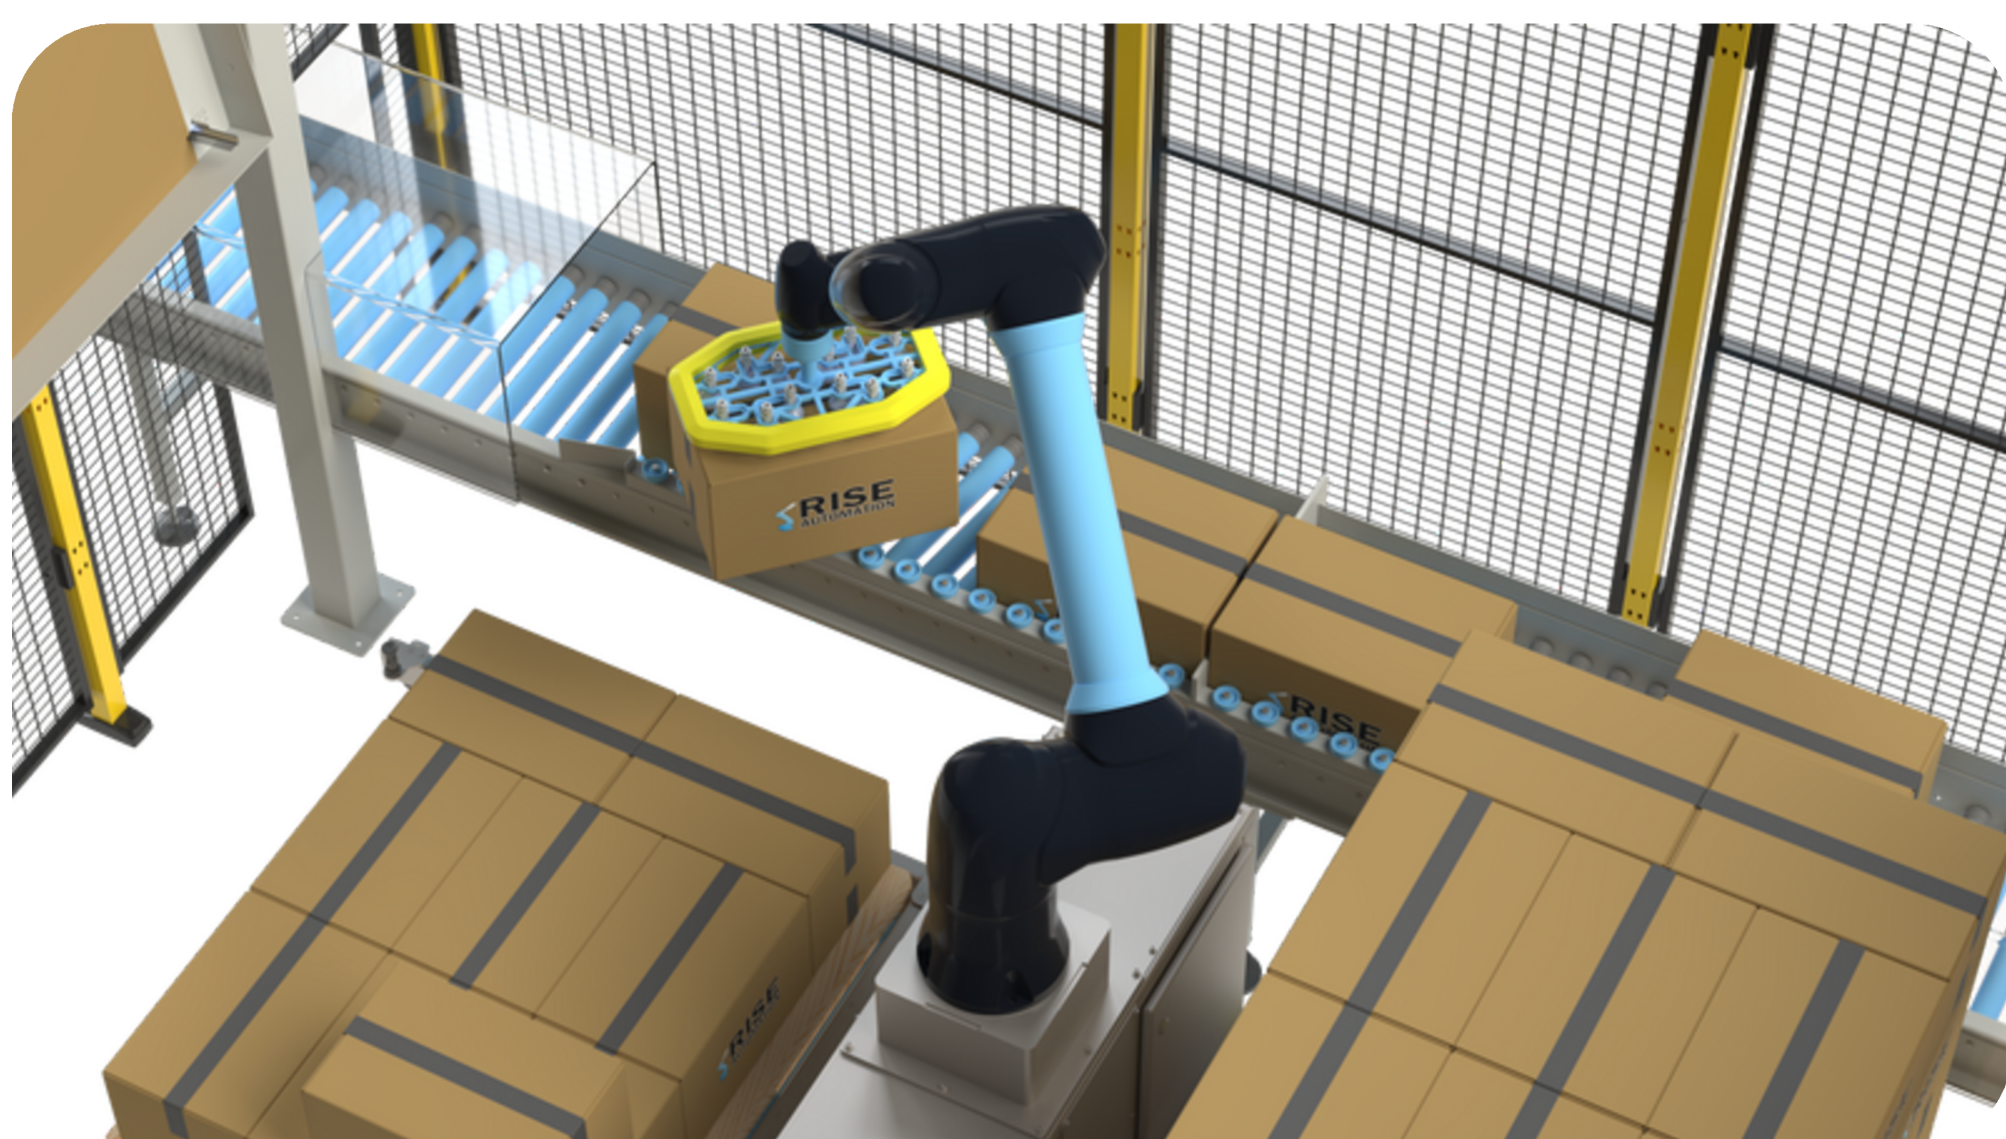

- Slip Sheet Holders
- Conveying
- Guarding
- Gripping Technology

- Palletising Software
- Mobile Palletising Base
- Status Indicator
- Safety Stop Zone

StackPro's programmable LED strips provide clear, visual cues for machine status, stack completion percentage, and any errors or warnings.

With the market's leading palletising software, new stacking formats can be created in as little as 10 minutes without the need for specialist robot programmers.

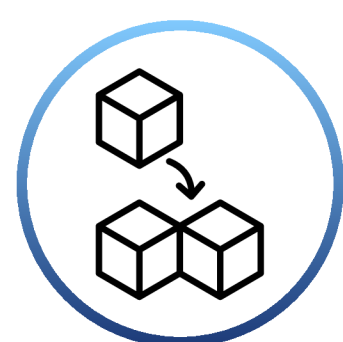

What can StackPro do for you?

Low Operator Input
Simple and intuitive interface

Cuts Manual Handling
Automates repetitive stacking tasks

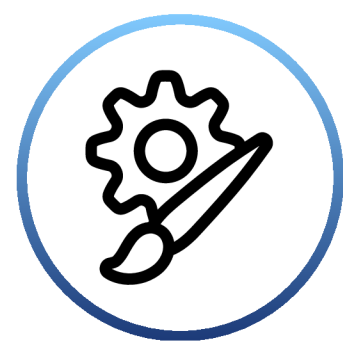

Compact and Modular
Low footprint ideal for most production lines designed for operatives.

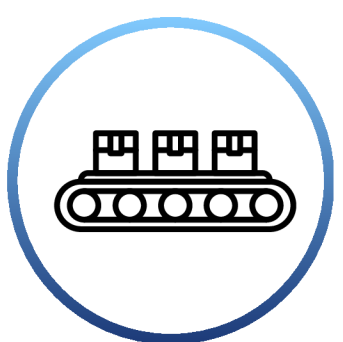

Minimal Training Required
Straightforward controls enabling rapid operator training

OEE
Data made available for customer monitoring

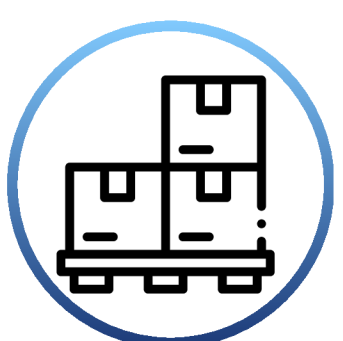

Available with tailored options
Customisable to meet specific application requirements and line configurations

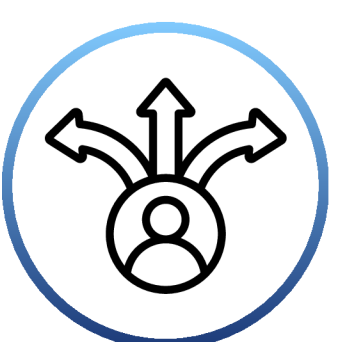

Conveying
Box and pallet conveyors for hygienic and industrial applications.

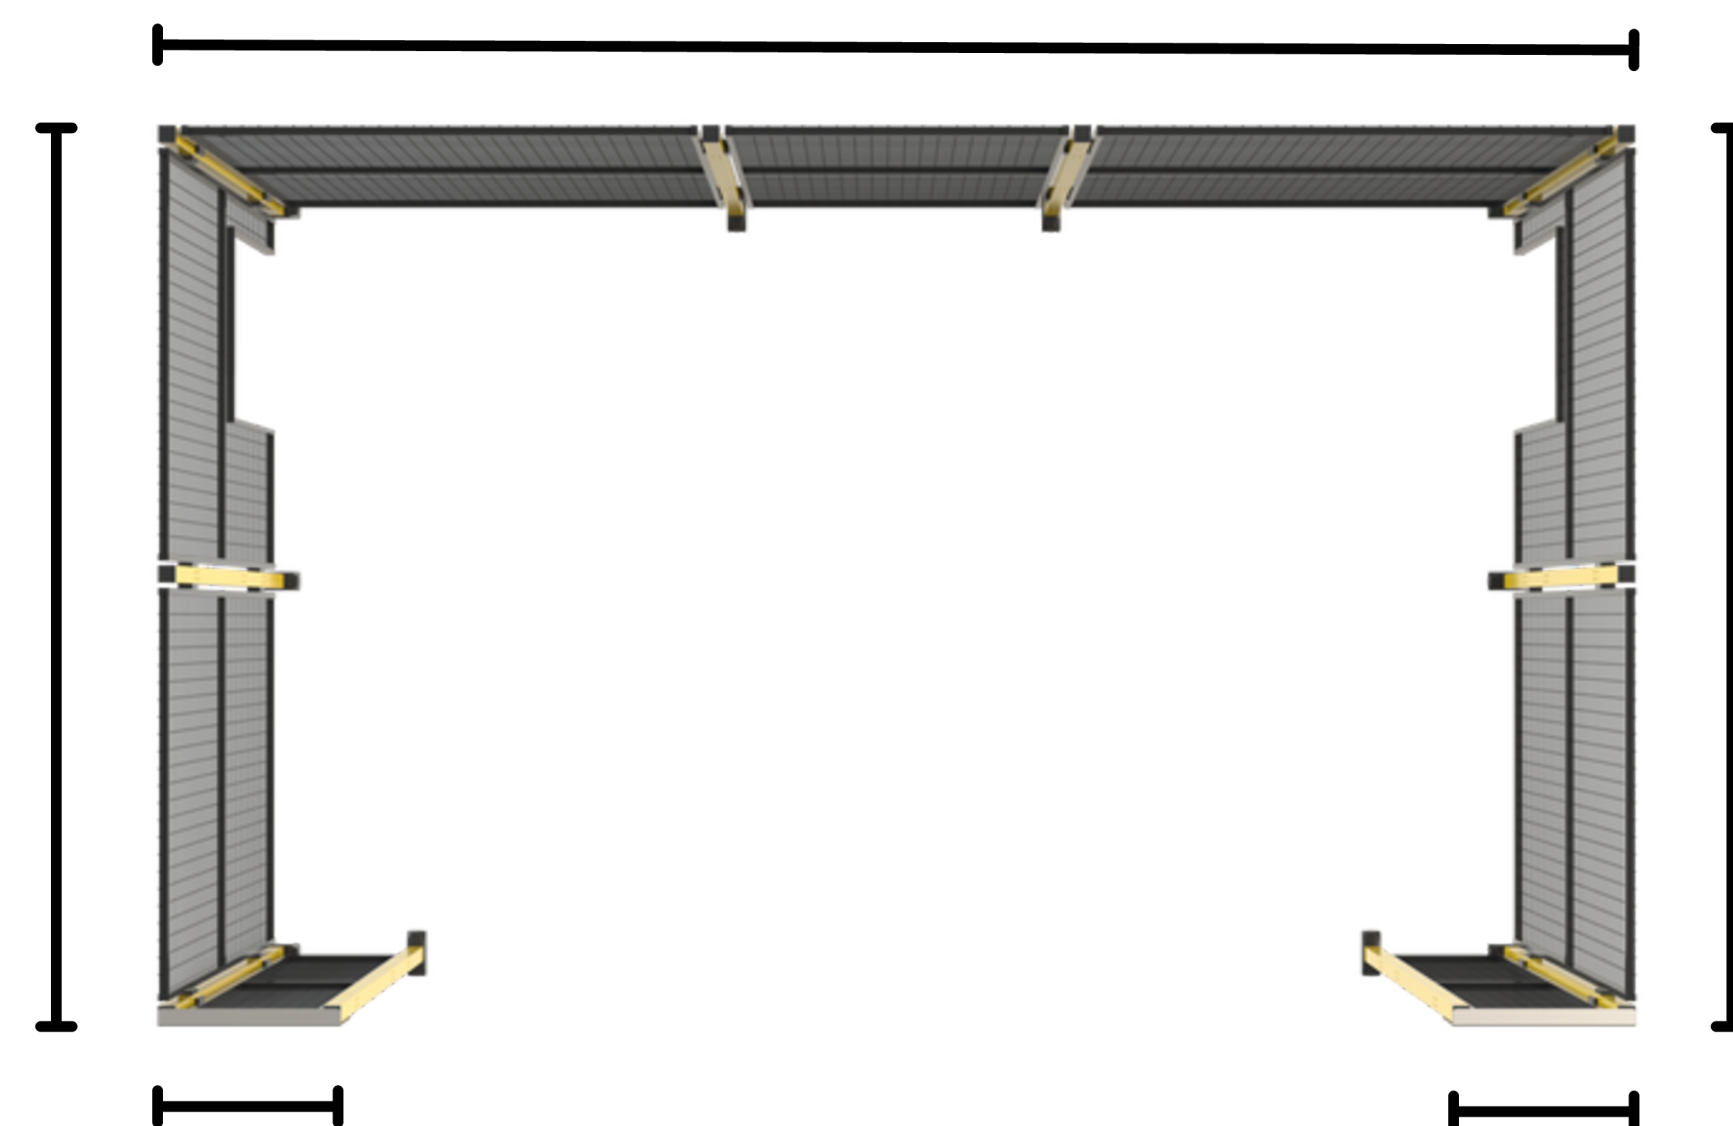

Box Erecting and Closing
Intermittent and continuous box erectors and closers for a range of applications.

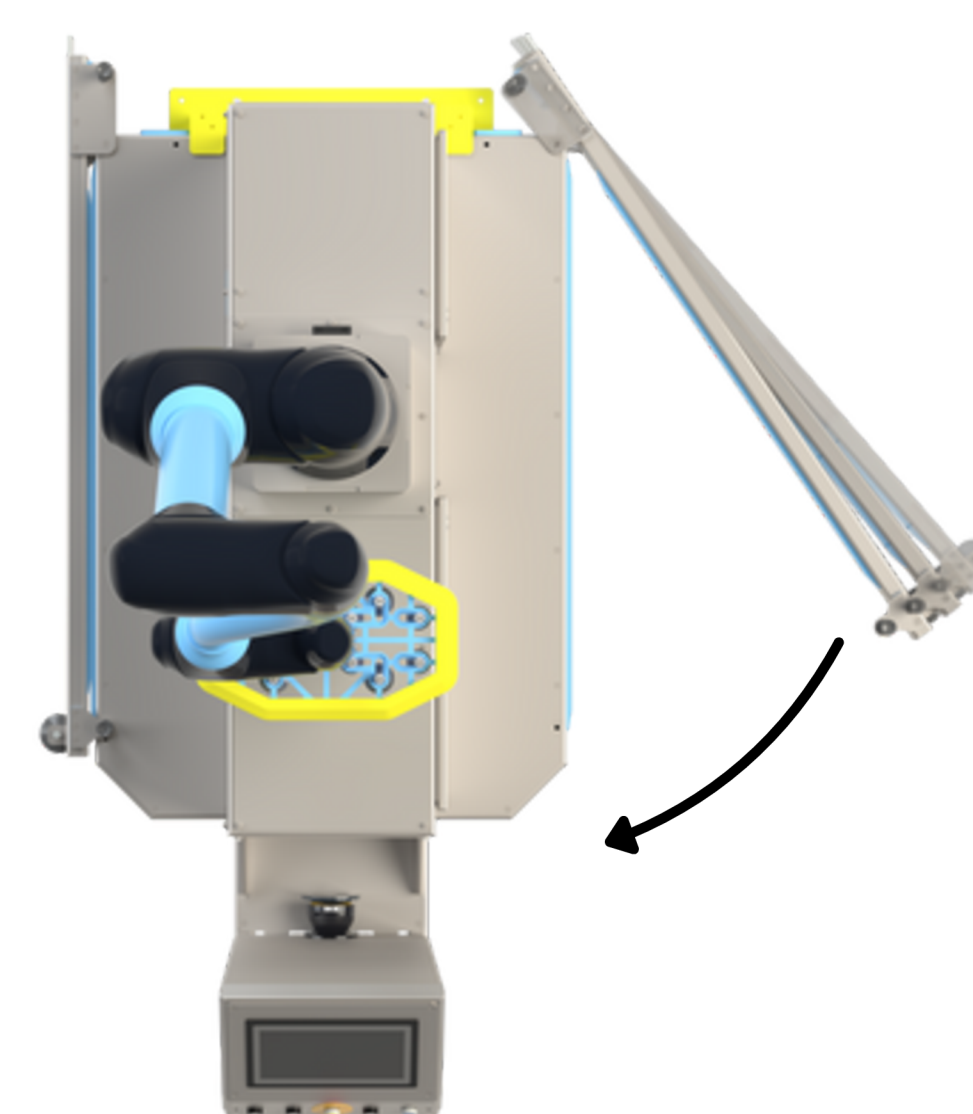

Pallet Wrapping
A range of inline and manual pallet wrappers available.

Control Systems
Bespoke control systems for stand alone palletisers and complete end of line solutions.

Customised Guarding
Designed to suit to your applications safety requirements.

Mobile design
Move between palletising cells with ease with our fold in outrigger system.
