

StackPro

Your cost effective and smart solution to automate stacking and de-stacking.

From £69,284

The Best
3D Interface
Available

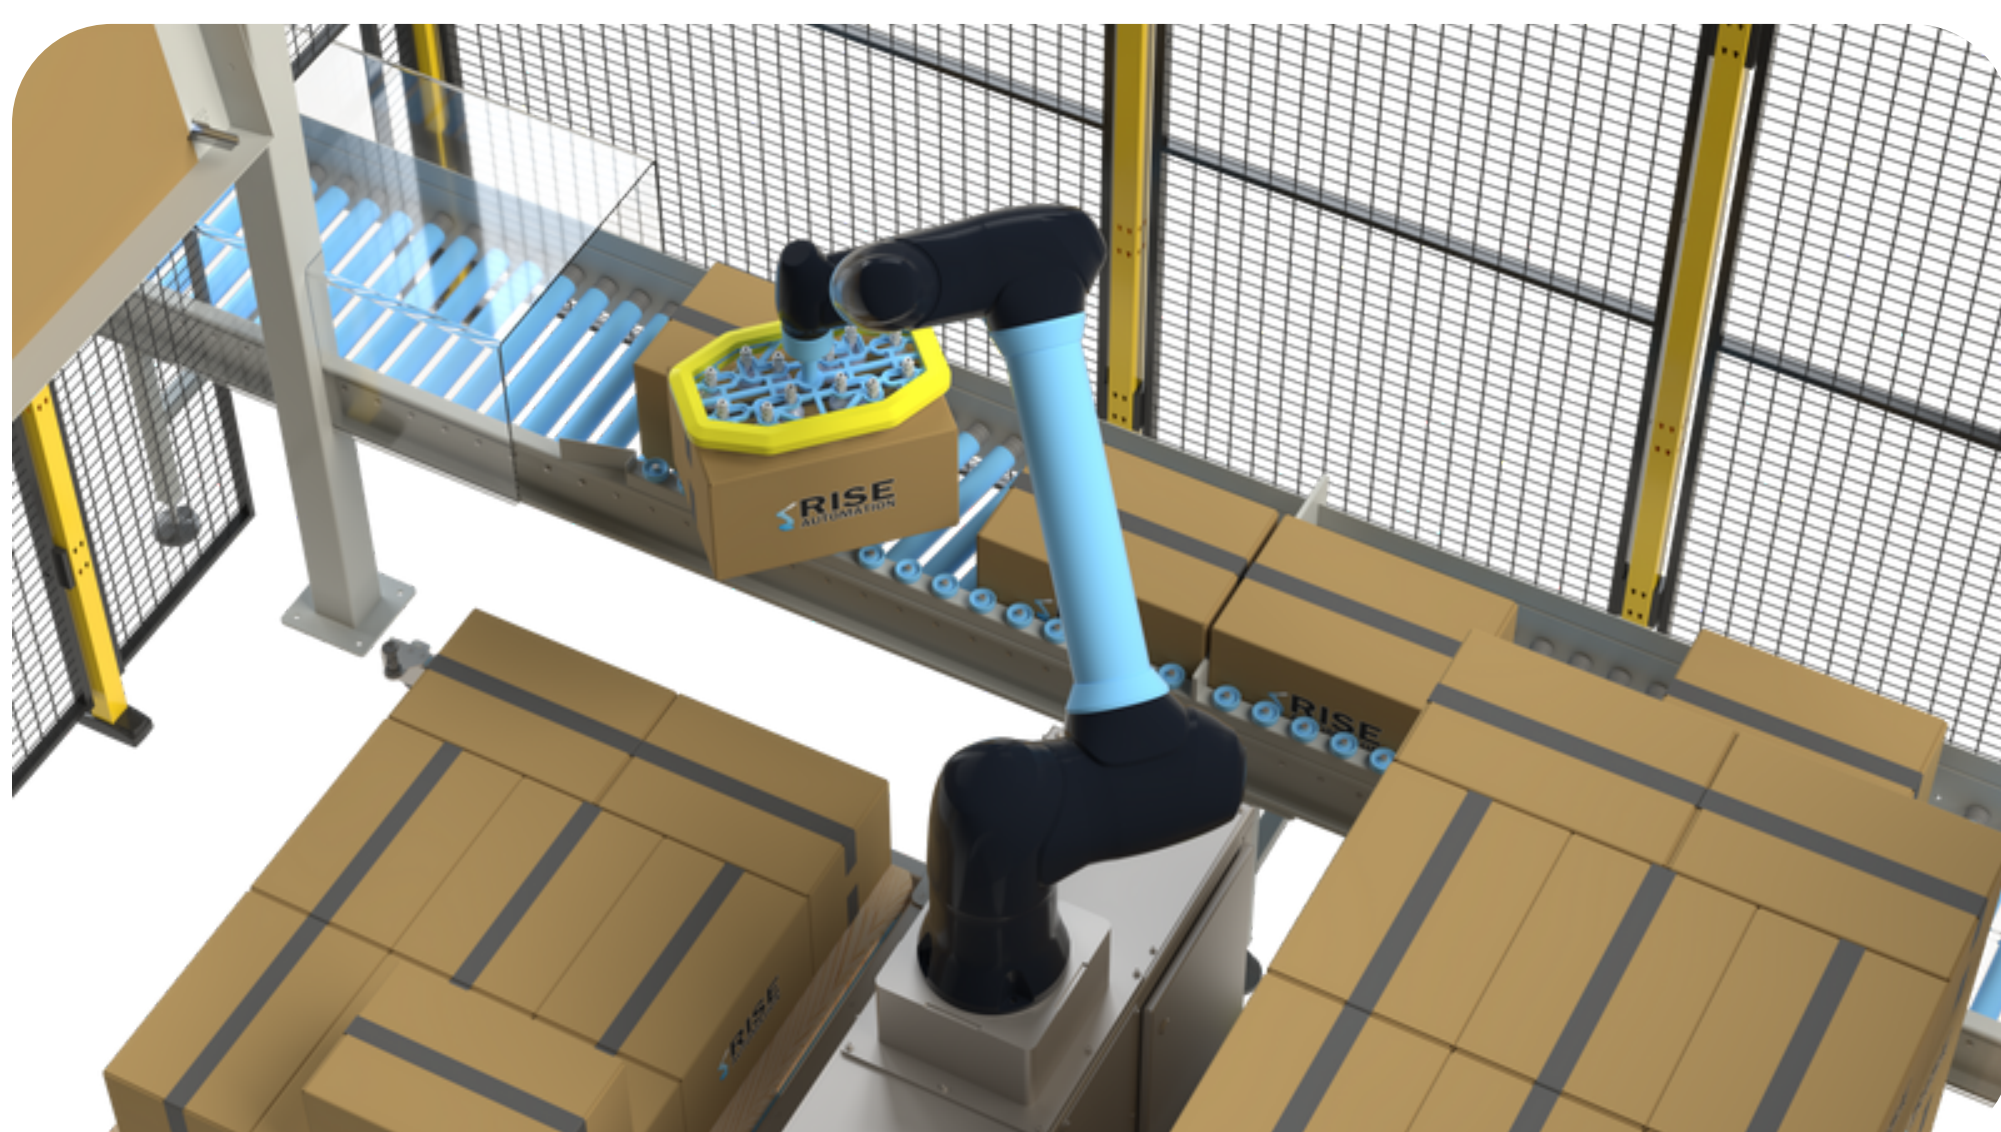

- Slip Sheet Holders
- Conveying
- Guarding
- Gripping Technology

- Palletising Software
- Mobile Palletising Base
- Status Indicator
- Safety Stop Zone

StackPro's programmable LED strips provide clear, visual cues for machine status, stack completion percentage, and any errors or warnings.

With the market's leading palletising software, new stacking formats can be created in as little as 10 minutes without the need for specialist robot programmers.

What can StackPro do for you?

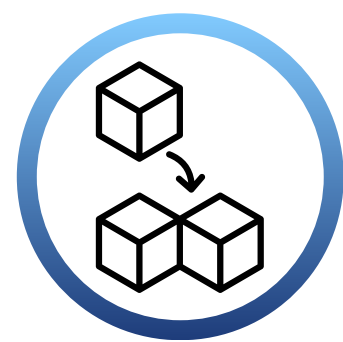

Low Operator Input

Requires minimal supervision for smooth operation

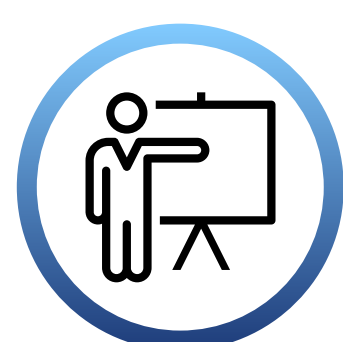

Cuts Manual Handling

Removes the need for repetitive manual stacking

Compact and Modular

Low footprint design, ideal for most production lines

Minimal Training Required

Straightforward controls enabling rapid operator training

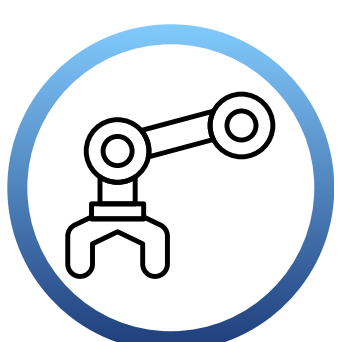

Overall Equipment Effectiveness

OEE data at your fingertips to optimise production

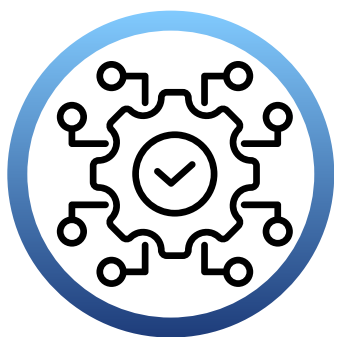

Available with tailored options

Customisable to meet specific application requirements and line configurations

Bespoke Gripper Design

Custom engineered grippers tailored to product, process and application

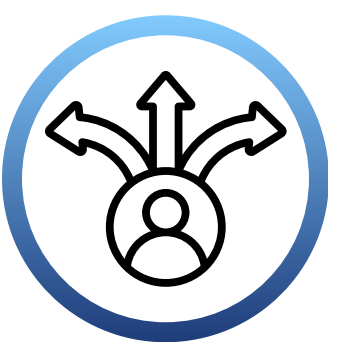

Localised / Separate Controls

Flexible setup with either on-machine or remote controls.

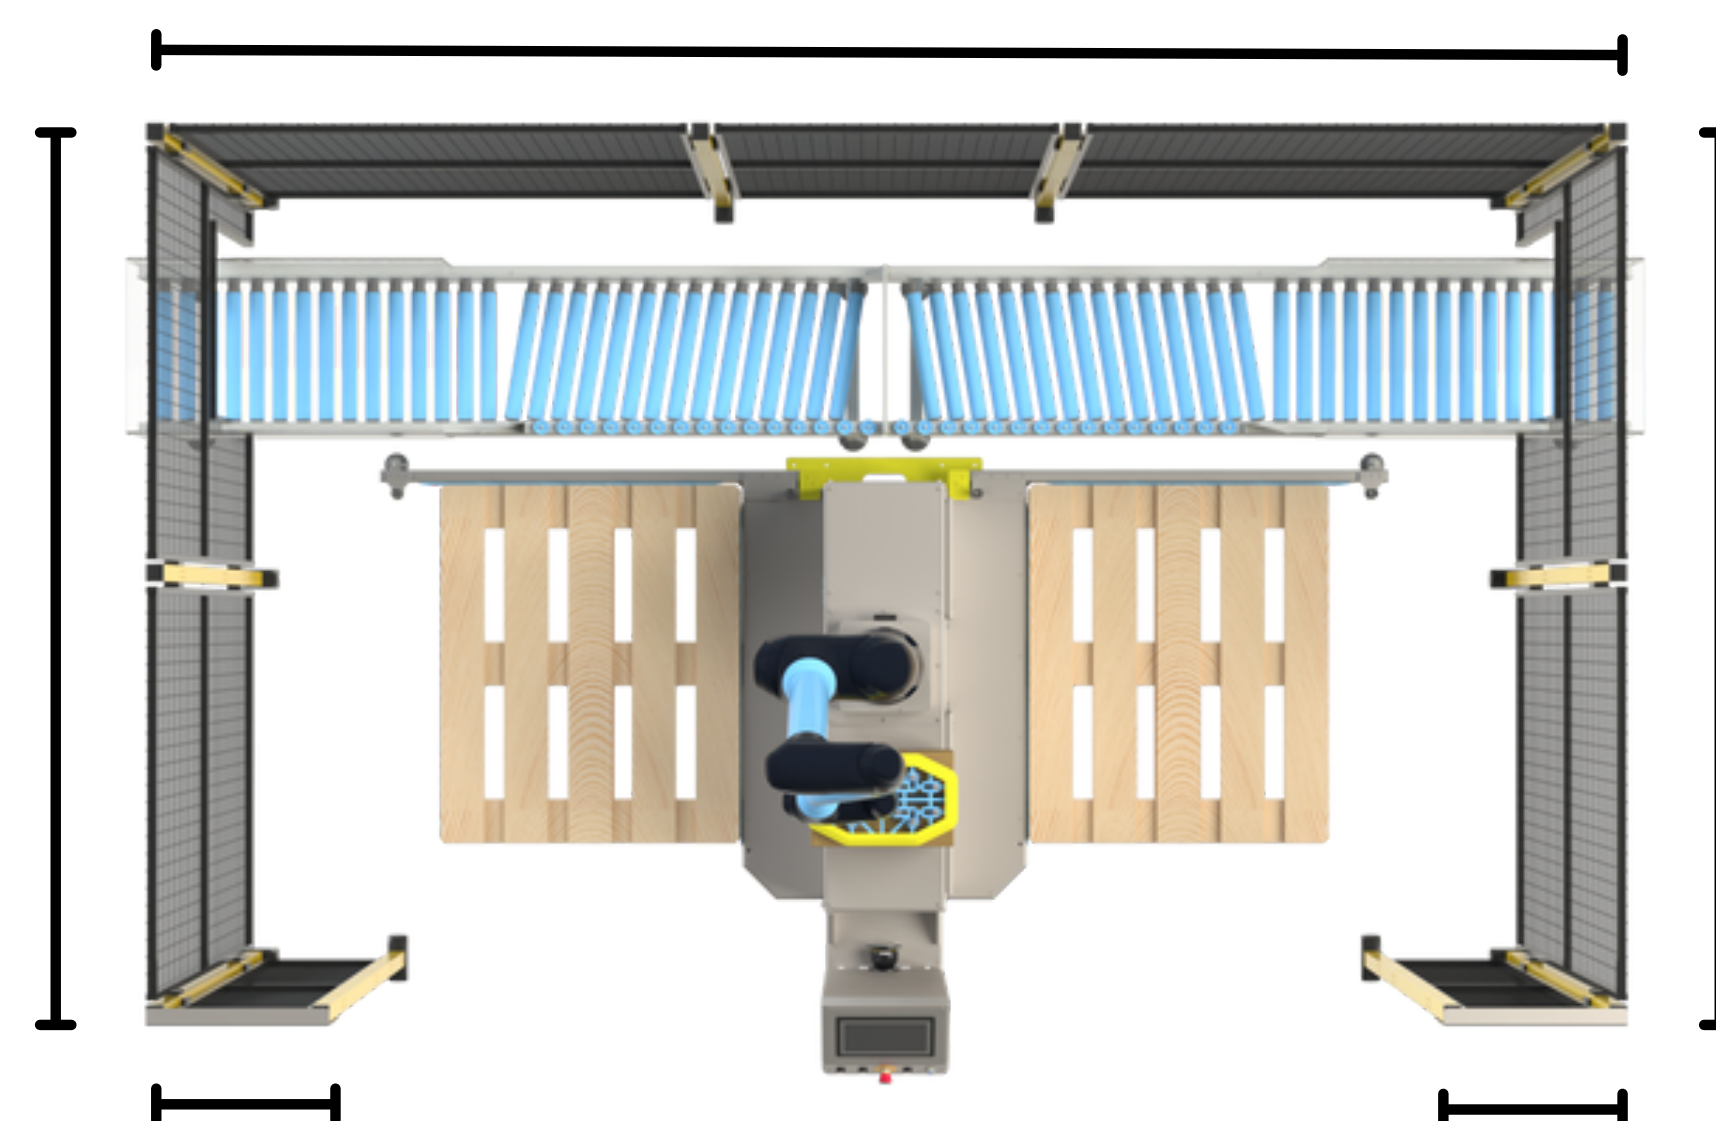

Status Indicator

LED strips on the machine front provide instant pallet status visibility.

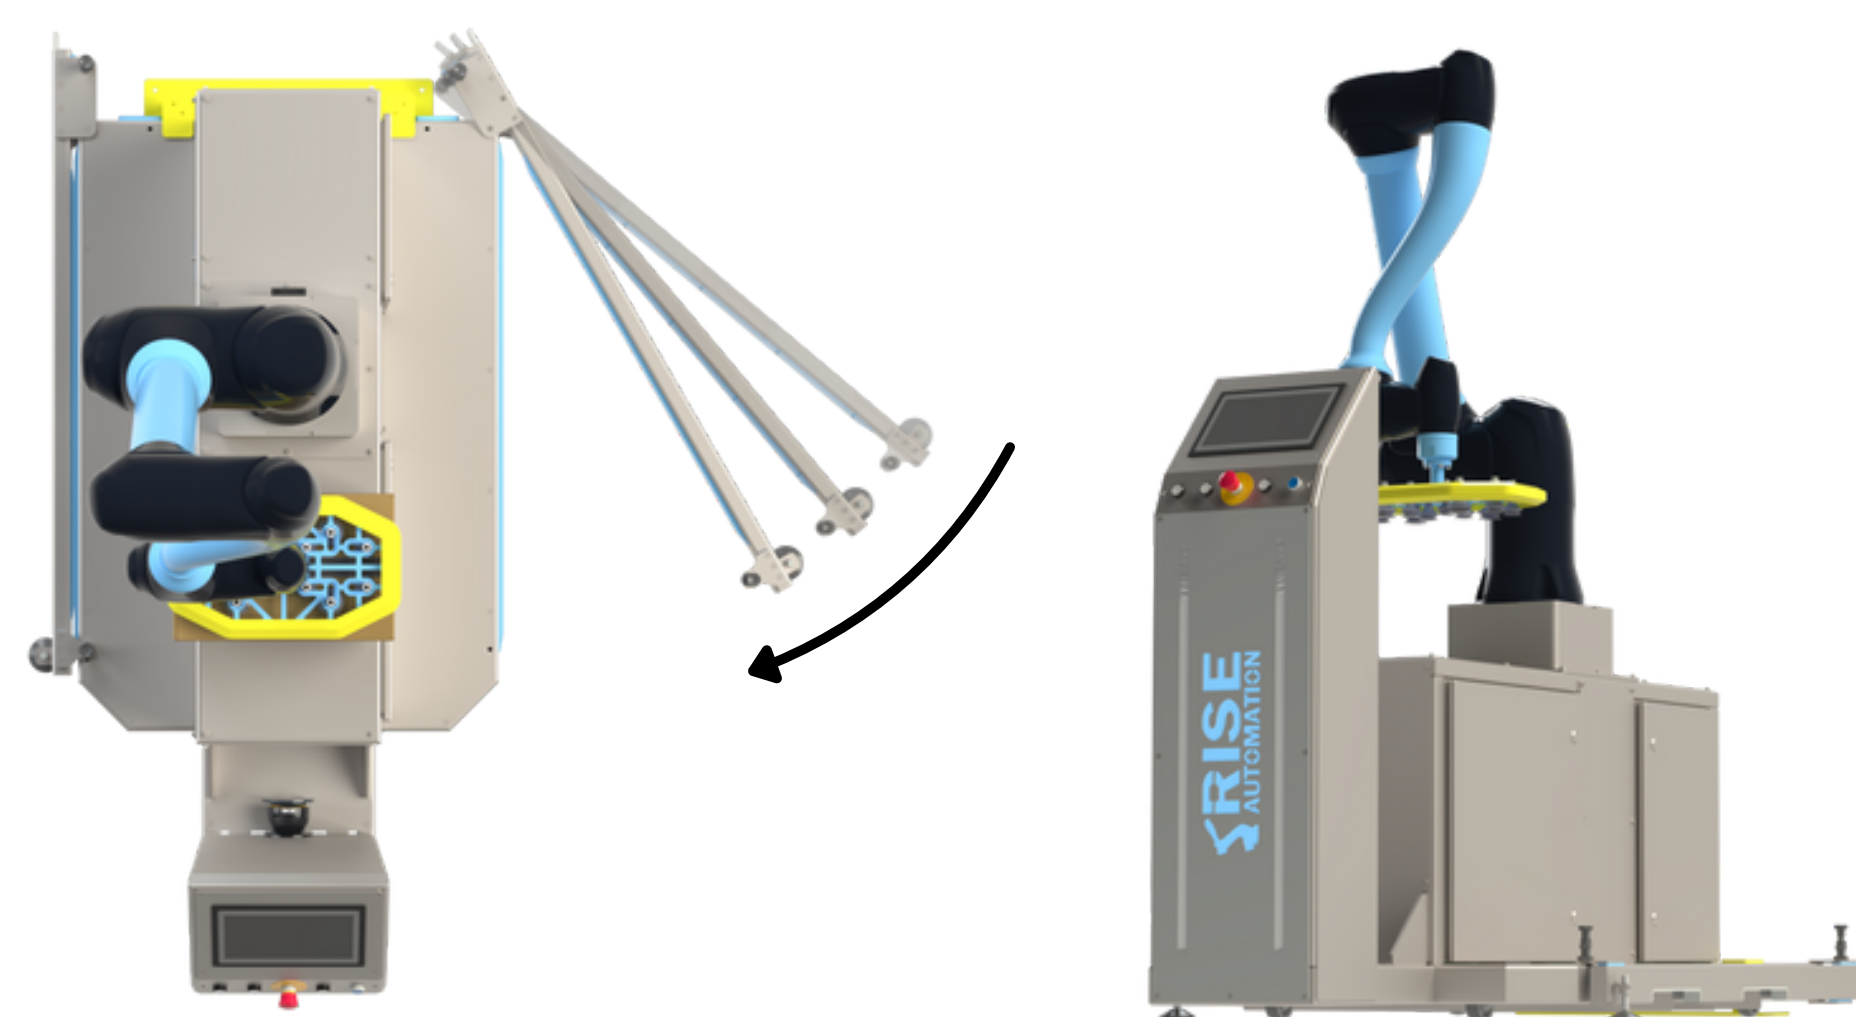

Control Systems

Bespoke control systems for stand alone palletisers and complete end of line solutions.

Customised Guarding

Designed to suit to your applications safety requirements

Mobile design

Move between palletising cells with ease with our fold in outrigger system
